Custom Stand Design

All temporary structures built for exhibitions must comply with the Building Code of Australia and all other statutory regulations current at the time of construction. This includes areas pertaining to egress, fire safety and flammability rating of materials.

All stands must be designed and constructed in accordance with all relevant Australian Standards. Dimensioned plans, including cross-sectional and elevation views, must be supplied for all stands over 2.4 metres in height, or stands designed to support weight other than light advertising material. Artist's impressions of stands are helpful, but may not be sufficient on their own. These plans are assessed to ascertain if the stand will comply with basic minimum standards. This appraisal does not include any measure of structural design or integrity, or include an assessment of construction methods.

The organiser / stand builder is responsible for ensuring that each stand has suitable clearance height below the existing ceiling / catwalk and that the stand is of the correct dimensions to fit the allocated stand size. The Centre will not cross-reference the stand plans with the event floor plan, unless specifically requested.

Stand plans, along with a completed Custom Stand Plan Appraisal Form (http://www.scec.com.au/content/library/Appendix_5.15_Custom_Stand_Plan_Appraisal_Form2.pdf) for each stand, should be sent directly to Agnes Zalan (azalan@scec.com.au), who will coordinate the appraisal process.
